

# A New Era for Aerospace Business

# Meeting of Big Data & Aerospace

Flying at  
20km above  
commercial  
airspace and  
bad weather

Certified  
aircraft with  
electrical  
propulsion

Autonomous  
control  
allowing  
versatile  
flight plan

Structural  
optimization  
(wing span  
around 40m)

Advanced  
Solar Panels  
for perpetual  
flight

Advanced  
energy  
storage to  
fly during  
night

# High flexibility missions

Flight at high altitude to guarantee **ALL-WEATHER OPERATIONS** and to ensure continuous and uninterrupted service

Versatile flight plan for **DIFFERENT TYPES OF MISSION** such like scanning, surveillance or target tracking

Infinite endurance for specific missions requiring **LONG-TERM ON-SITE PRESENCE, REAL TIME INFORMATION** or **HIGH REVISIT FREQUENCY**

High flexibility in the choice of payloads and opportunity to integrate several **DIFFERENT SENSORS ON THE SAME MISSION**

# Why now?

A/C Performances & Aerodynamic Behavior

Large Composite Parts & Complex Integration

High Performance Solar Panels

Control, Navigation & Autonomous Systems

Small, Low Power, High Resolution Sensors

Extreme Environmental Conditions

Large Light-Weight Constructions

High Energy Density Batteries

Airworthiness & Regulation

Cheap Data Storage & Post-processing

# Three Aeronautic Companies

STEMME

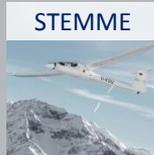

STEMME is an aeronautical company specialized in design and manufacturing of **high-performance motorized gliders**, and that brings skills related to **aircraft definition** and **UAV design**

SONACA  
GROUP

SONACA is an aeronautical company specialized in design and manufacturing of **advanced structural parts**, and that brings skills related to **engineering** and **system integration**

sabena  
aerospace

SABENA AEROSPACE is an aeronautical company specialized in **aviation services**, and that brings skills related to **aircraft operation** and **international logistics**

**JOINT VENTURE**  
*Aircraft & Operations*

# A Roadmap Based on Existing Solutions

**2018**

**EXISTING AIRPLANE**

**2020**

**MALE UAV**

**2021**

**HIGH ALTITUDE UAV  
DEMONSTRATOR**

**2023**

**HAPS**
